Conclusion/Brief comment:

This application is to extend and alter the existing outbuilding to create a dower unit to the west boundary of the site and to demolish a section of wall adjacent to the outbuilding to insert a pedestrian gate.

The proposed dower unit will comprise a bedroom, bathroom and lounge within the existing structure and a large kitchenette/diner in the proposed extension. In support of the application the applicant's agent by letter (dated 20/03/24) has confirmed that the dower unit will be used for a purpose ancillary to the main use of the dwelling house by the applicant's family members. The letter confirms that the garden space, utilities and parking will all be shared with the occupiers of the main dwelling and that some main meals will be taken in the main dwelling.

Although the floor space of the dower unit once extended is relatively generous, the relationship of the occupiers of the dower unit and the principal dwelling, the nature of use and facilities to be shared indicate that the additional accommodation would be subsidiary to and dependent upon the principal dwelling unit.

Despite the property being within the St Peter Port Main Centre Outer Area, where new units of accommodation can be permitted, the agent has stipulated that in this instance the unit will remain in use by family members only. It is recommended that for the avoidance of any doubt an informative is included on any permission to ensure that the accommodation provided remains ancillary to the main dwellinghouse and to advise that an application will be required should things change.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The proposal will retain adequate parking to serve the property.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
