Conclusion/Brief comment:

This application is to install a pedestrian and vehicular gate across the south entrance to the site. It has been confirmed by the agent that the red line boundary does incorporate the entrance into the applicant's land, which is all domestic curtilage.

The area is quite rural and none of the surrounding properties currently have entrance gates. Since the detached garage has been built it does mean there is no line of sight to this entrance from the house and so the applicant wants to install a solid domestic style gate for safety/security. However, the design is not considered

to have any detrimental impacts to the character and appearance of the surrounding area, nor will it have any adverse effects on neighbour amenity.

As a secondary access to the site and given its layout the installation of gates as shown will not have an adverse impact on highway safety.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
