Conclusion/Brief comment:

Planning permission is sought to replace two pairs of patio doors to the rear elevation of the property. As initially proposed the replacement doors were to be constructed from uPVC, but following deferral of the application, the applicant has agreed to replace the patio doors in high quality timber on a like for like basis.

It is a requirement under the Land Planning and Development (Guernsey) Law, 2005, when considering applications affecting protected buildings, to secure so far as possible that the special historic, architectural, traditional or other special characteristics (including setting) are preserved. This duty is reflected in Policy GP5 of the IDP.

The replacement doors have been designed appropriately to be in-keeping with the host dwelling and the character and appearance of the surrounding area. The proposal would replace a modern addition to the property and would not cause harm to the special interest of the protected building. However, to ensure that the windows are appropriately detailed, it is recommended that a condition is included on any permission for large scale drawings of the patio doors and glazing bars to be submitted.

The proposal would not harm residential amenity or impact on highway safety. Information has been provided to demonstrate that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

For the reasons contained within this report it is considered that the proposal accords with the above mentioned Policies of the Island Development Plan.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
