Conclusion/Brief comment:

This is a revised retrospective application to remove a hedge and erect a fence along the north end of the western boundary. The previously refused scheme showed a 2m high fence right up to the road. The previous application had been deferred requesting the reduction of the fence panel closest to the road in order to reduce the visual impact of the fence, at the time the applicant refused to do so, which resulted in the refusal.

This revised scheme has now reduced the fence panel closest to the road down to 0.9m high, which is what was requested during the previous application process.

Generally we would request more than the last fence panel to be reduced forward for the building line facing a highway. However, the neighbouring property has built an equally high fence around their oil tank/bin store at the front of their property which prevents any other fence panels from being reduced.

Reducing the fence panel closest to the road still ensures good visibility splays for occupiers leaving the property and reduces the visual impact on the surrounding area.

The proposals are now not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on either of the immediate neighbours.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
