Conclusion/Brief comment:

Policy IP12: Crematoria and Burial Sites; of the Island Development Plan supports the extension, alteration or redevelopment of existing crematoria and burial sites and ancillary development associated with them, within the existing site, provided that the development accords with other relevant policies of the IDP.

Policy GP8 of the Island Development Plan states a number of criteria that new development will be expected to adhere to in order to achieve a high standard of design which respects and where appropriate enhances the character of the environment.

The site is bounded by semi mature trees and hedging along the northern boundary, with hedging also to the main front (western) boundary and a combination of walls and tree/hedging to the remaining boundaries.

The alterations to the paths include replacing existing gravel paths with permeable brick paving, and the creation of an extension to the main access road within the site and new smaller paths, all in permeable brick paving. These alterations are proposed to the centre of the site, and will not be prominent from the front

entrance. The works will be visible from some neighbouring residential dwellings, but the use of permeable brick paving is considered acceptable, sustainable and in-keeping with the surrounding area. There is not considered to be any significant harm to the character or visual appearance of the surrounding area.

The proposal would not impact on neighbour amenity, nor would it cause a detriment to highway safety.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
