Conclusion/Brief comment:

This application is to erect a two storey mono-pitched extension to the south elevation, to create a larger porch on the ground floor and enlarge one bedroom and create a study and extra bathroom at first floor.

Initially the proposal was for a flat roof extension, but concerns were raised regarding the appearance of the extension at the front of the property and the application was deferred.

The amended drawings now show a mono-pitch roof to the extension which angles back to the main roof. A new window has been added to the first floor in the new

bathroom, which helps to balance the front façade and all the first floor windows are now the same size.

The proposals are now considered to achieve a satisfactory standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
