'I have reviewed the proposed plans for the installation of an electrical substation and enclosure, to the south-east of the above site.

I am concerned that noise from the substation may adversely impact the nearest domestic property and I would therefore recommend that the following condition is attached to any issued planning consent:

- *Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. I would be grateful if this issue and condition are considered during the determination of this application.'
