Conclusion/Brief comment:

This application is to demolish a section of rear boundary wall which is single brick construction and to replace it with a block rendered wall to the same height and length dimensions. This is because the brick wall has cracked and is visibly very wobbly.

The brick wall has mostly been held up by the large amount of bamboo which had been growing in front of it. The bamboo has since been removed leaving the wall unstable.

A structural engineers has been to assess the wall and recommended it be replaced for safety reasons.

The neighbouring property and the top rear tier of the applicants garden are at the same level, where the wall is 1.2m. On the applicants side the section of wall to be replaced is the top section built upon a retaining granite wall, which gets wider as it goes down.

The instability of the top section of the brick wall is very clear to see. The proposals are considered to be acceptable in order to make the boundary safe for both neighbours and having regard to the character and appearance of the locality.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
