OFFICER'S REPORT

GP6: Protected Monuments

GP8: Design

GP9: Sustainable development

Conclusion/Brief comment:

Removal of the existing pillar and infilling of the aperture on the roadside wall to match the remainder of the wall would have no adverse impacts, and the colour and laying of the infill granite can be controlled by condition.

The proposed new pillar would be set within an existing granite wall on the east side of La Neuve Rue. Whilst likely to project above the height of the wall, the pillar would be finished in unpainted stainless steel and would not result in significant visual impacts. The pillar would be set away from the protected trough on the other side of the track to the south and would not have adverse impacts on that trough.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
