Conclusion/Brief comment:

This application is to raise the roof to create first floor accommodation, including a balcony over the single storey east wing. Some alterations to the fenestration and a further small ground floor extension to the west wing extension.

The Island Development Plan supports multi storey living and the steep topography behind the dwelling will disguise the rise in height. The topography will also help negate any overlooking or overshadowing issues. The nearest neighbour is over 20m away to the west and the next is over 30m away to the east.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
