Conclusion/Brief comment:

This is a retrospective application to remove a hedge along the east and the majority of the south boundary and install a 1.2m high fence along the east boundary and an average 1.8m high fence along the majority of the south boundary.

The east boundary fence is 1.2m, which is an appropriate height, allowing views out to sea. The neighbouring property to the northeast is at a lower level, so the height of the fence on their side is approx. 2.4m, however, there is a sloping rockery on the neighbours side which disguises the height and the fence is considered to be appropriate and acceptable.

The fence along the south elevation is between 1.8 and 2.2m depending on the topography, with the majority being at the exempt height of 2m. There are no concerns over the location and height of this boundary. The fences do not form prominent features in public views and they have a limited impact on the character and appearance of the area.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
