Believe that the installation would not achieve a level 5dB(A) below the existing LA90 background noise level, including low frequency tones of the area. In the absence of an acoustic report, there is currently insufficient information to be able to comment on this application. An acoustic report, by an appropriately qualified professional, should be provided that detail that the installation of the ASHP will meet a 5dB(A) below the existing LA90 background noise level, including low frequency tones.

19/07/2024

Note the repositioning of the heat pump and welcome this revision but remain concerned about the potential for statutory nuisance however believe that this can be suitably mitigated by the inclusion of a suitably worded planning condition.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
