Conclusion/Brief comment:

This application is to raise the height of the existing front garden wall. Initially the proposal was to raise the height of the wall to 1.8m high to match the existing wall which separates the front drive with the rear patio area. The existing 1.8m high wall is behind the building line.

The application was deferred to allow the agent to address the height of the proposed wall. The wall now starts at a height of 1.5m and as it meanders it way towards the road the wall will decrease in height, first to 1.2m and then finally down the existing height of 0.8m closest to the road.

Allowing the wall to be higher closer to the building means the height will protect the privacy of the large lounge window, and letting it decrease in height towards the road prevents the barricading effect.

The proposed wall is not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will it have any adverse effects on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
