Conclusion/Brief comment:

This application is to demolish the rear extensions and remove the chimneys, and erect a single storey extension which wraps around the west side and north rear elevations, some alterations to the fenestration and finally to widen the vehicular opening by 500mm.

The existing extensions have no architectural merit and so their removal is considered acceptable. The chimney removal is considered to be appropriate as the dwellings in the area are all set back from the road and the chimneys do not read as part of the street scene as they do in higher density areas.

The new single storey wrap around extension is considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area or on the setting of the adjacent protected buildings, nor will they have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
