Conclusion/Brief comment:

This application is to demolish the existing rear extension and erect a single storey extension in its place, install a large dormer window to the rear with two windows and a captains dormer to the front roof slope along with a single rooflight.

Initially the captains dormer was excessively sized for the roofslope and appeared dominant on the building. The rear dormer window, whilst substantial, would be largely screened from public views and would therefore be of limited visual impact. The windows in that dormer, serving an ensuite and a dressing room, were however to be clear glazed, which would overlook the neighbours garden. The application was deferred to allow for some changes to be made.

Amended drawings have since been received and the captains dormer has been reduced, it is still a reasonable size, but as there are numerous examples of similar dormer windows around the historic town, it is considered acceptable.

The rear dormer windows will now have obscure glazing to prevent overlooking and the feeling of being overlooked.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The dormers and new extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormers and extension are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
