Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the west of the south elevation, to house a dining room, and to widen the existing vehicular access to 5.1m.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The property is situated outside of the main centres and is not within a conservation area, therefore opening the vehicular entrance up by 1m is not considered to have any detrimental impacts on the character or appearance of the surrounding area, or effect any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
