Conclusion/Brief comment:

This application is to raise and extend the lean-to roof across the rear of the property, to allow a partial mezzanine for a study, and a double height kitchen area. The existing cover to the patio area will also be replaced.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposed alterations are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will

they have any impact on either of the immediate neighbours. There may be the opportunity to look out of the study rooflights, but the windows are low and the views would be over the covered area and rooftops rather than into any private amenity spaces.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
