Conclusion/Brief comment:

This application is to erect a single storey extension/orangery to the west rear elevation, some internal alterations and some alterations to the fenestration.

Initially the application was deferred because the style of the proposed orangery was very classical, which was not sympathetic with the traditional style of the existing dwelling. As the dwelling is a protected building it was felt that the detailing of the proposed extension needs to complement the existing dwelling rather than compete with it.

The drawings were amended and the proposal is now considered to complement the existing dwelling with a much more traditional style.

As the internal fit-out is generally modern the proposed minimal internal alterations are considered to meet policy GP5, as do the alterations to the fenestration.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the special quality of the protected building, or on the character and amenity of the surrounding conservation area. Neither will it have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
