Conclusion/Brief comment:

This application is to repair and replace some of the windows of the south, east and north elevations of the protected building.

A Statement of Significance has been provided and a comprehensive window schedule and photographic survey, as recommended by CN11. It is proposed to replace a number of windows and/or window frames with accoya units but in slimline double glazing and with some changes to pane configuration. The reasons for replacement are given as a desire to improve thermal performance and to reduce draughts, which in this case is considered to be a reasonable aspiration of the homeowner that outweighs the special interest of the protected building.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
