Conclusion/Brief comment:

This application is to repair a retaining wall and install a sleeper wall in front of it along part of the west boundary.

The ground level around the community building is at a much higher level than the ground level of the orchard, and there is a retaining wall along the boundary. During a large storm last year part of the retaining wall begun to come away from the bank it is meant to be retaining. This was dangerous because the community land adjacent to the retaining wall is used as a playground. This application is seeking to repair the existing wall and then build a sleeper wall in front for extra protection.

When driving along Route de St Andre, the orchard is very visible, although the rear boundary is not so visible especially in the summer when the trees are full of leaves. However, the proposal to use sleepers to face the existing rendered wall is considered to be a more natural finish that is appropriate for the area.

The proposals achieve a good standard of design, using materials which complement the area. The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impact on any of the immediate neighbours.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
