Conclusion/Brief comment:

This application is to erect a small front porch and a single storey pitched roof extension, to house a utility room and WC, to the front north elevation and a part single storey and part two storey extension to the rear south elevation.

The proposals are almost identical to the previously approved FULL/2021/0459 application, apart from omitting the additional first floor bathroom above the kitchen.

The new scheme is of reduced massing without the additional first floor bathroom extension, which would mean improve the relationship of the scheme with its surroundings.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
