Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The proposed extension is of small scale, simple design that relates well to the original building in terms of its proportionality, layout and materials (Policy GP5). The extension is sympathetic to its setting in terms of its height and form as it has

carefully taken into account the existing fenestration and does not seek to either alter, or create, new openings in the building. The use of natural timber cladding is acceptable.

Overall, the proposal will have a negligible effect on the special interest of the protected building (Policy GP5).

Due to its position and design, the proposal will not have a detrimental impact on the character or appearance of the Conservation Area (Policy GP4), visual amenity, or the amenities of neighbouring residents when taking into account the scale, fenestration and relationship to neighbouring properties (GP8 and GP9).

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
