### Conclusion/Brief comment:

This application is a retrospective application to erect a shed, greenhouse and pergola, and some fencing along the northeast boundary.

The new 5.9m x 3.01m shed replaces the existing shed in the northern corner of the site, the new greenhouse is a little to the southeast within a vegetable patch area of the garden. The pergola is above the existing pond to the southeast of the dwelling, and the fencing is inside the existing and thriving boundary hedge to the northeast boundary.

All the items are considered reasonable additions to the property and in some cases the only reason there is an application is because all the items are forward of the building line facing a highway due to the corner location of the property.

The scale and massing of the retrospective proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

Grant with Conditions
