Conclusion/Brief comment:

This application is to replace the existing third storey balustrade with a new glazed balustrade.

The existing balustrade can hardly be seen as it is behind the buildings parapet. The parapet is to remain, which will help to screen the new balustrade, plus the new balustrade will be made of glass which will also help it disappear from sight.

The proposals are considered to achieve a good standard of design, using materials which suit the location and application. The scale and massing of the new balustrade is not considered to have a detrimental effect on the character and amenity of the

surrounding conservation area, nor will it have any impacts on either of the immediate neighbours.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
