Conclusion/Brief comment:

This application is to raise the roof to create first floor accommodation, erect a single storey extension to the north elevation and replace the southern extension to the west side of the south elevation. Finally erect a three bay detached garage to the rear of the property with additional accommodation above.

Due to the rural nature of the location and the IDP's support in multi-level living, the proposal to raise the roof to allow for first floor accommodation is considered acceptable, especially as there are no nearby neighbours to overshadow or overlook.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new first floor and the extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on any of the neighbours due to the distance between them.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
