Conclusion/Brief comment:

This application was initially to install two pitched roof dormers and a rooflight to the south front roof slope and one large flat roof dormer to the rear with three windows, the windows at either end of the dormer were to be Juliet balconies. Create a first floor terrace above the existing flat roof rear extension and convert one of the first floor windows to a door. Add some additional rooflights to the rear roof slope and increase the size of the front pedestrian opening to allow vehicles onto the site and replace the front garden with a parking area.

Due to the high probability of overlooking from the first floor terrace and the second floor Juliet balconies the application was deferred. The terrace has been omitted along with the window to door conversion and the rear dormer has been reduced in size to allow the stairs to the second floor to be inserted. With these omissions the overlooking has been mitigated, and the proposals are considered to comply with policy.

Until fairly recently the three dwellings had vehicular access at the rear of the properties, with no gardens, you could drive right around the three properties. Since then a 1.8m high fence has been constructed to the rear of the dwellings to give three separate garden areas. The end properties each retain vehicular access to the side, but the central property does not have any parking. Hence the proposal to enlarge the existing pedestrian access at the front of the property.

All of the properties have a roadside granite boundary wall which, apart from the pedestrian accesses, is continuous. To open the central pedestrian access to 5m with a bell-mouth detail is not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will it have any adverse effects on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
