**Conclusion/Brief comment:**

This application is to demolish a section of the existing glasshouse and erect a 1½ storey garage to the north-west of the dwelling.

The ground level of the existing glasshouse is approximately 2.5m lower than the road level, as the land falls away from the southwest to the northeast. The dwelling is also at a slightly higher level than the glasshouse, which means that the 1½ storey detached garage will be subservient to the main dwelling as the ridge will be lower when looking at the property from the road.

The new detached garage will be built on land that is recognised as domestic curtilage. The remaining part of the glasshouse is on agricultural land, the earthbank in the field denotes the new boundary between the two land uses.

The proposed new garage is considered to achieve a good standard of design, using natural materials which will complement the existing materials. The scale and massing of the new garage is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on the closest neighbour.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
