Conclusion/Brief comment:

This application is to install a custom made timber sliding gate across the front vehicular entrance to the south of the property.

At present the south boundary comprises a low granite wall with a hedge above apart from where the vehicular entrance is. The proposal is to install the gate between 2m and 1.6m into the site (where the level ground is) with the gate opening eastward.

The make, style and massing of the gate is not considered to have any detrimental impacts on the character and appearance of the surrounding conservation area, nor will it impact on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
