Conclusion/Brief comment:

This application is to replace a section of the conservatory roof, at the rear of the building, with a solid roof covering.

A proportionate Statement of Significance stated that the area of conservatory to be replaced is the modern extension to the original conservatory which was extended in the 1990's, which means there will be less of an impact on the special interest of the rest of the original protected building.

The proposals are to the rear of the property and will not be seen from any public vantage points, therefore there will be no detrimental impacts on the character and appearance of the surrounding Conservation Area, nor will there be any adverse effects on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
