OFFICER'S REPORT

Site Description:

The property known as 'Kawarau' is now a brand new one and a half storey dwelling which is set back from and faces east onto La Planque. There is an access track along the south boundary leading to another detached dwelling to the west. The new vehicular access is directly off La Planque. The property is located Outside of the Centres as defined in the Island Development Plan.

Relevant History:

FULL/2022/2015 - Demolish chimney and extensions, extend at ground floor level to east (front), west (rear) and south (side) elevations and create basement, install oil tank and granite finish to walls, alterations to fenestration and create vehicle access to east boundary – Approved December 2022.

Existing Use(s):

Residential use class 1: dwelling house.

Brief Description of Development:

This application is to install first floor gable windows to the north and south gable elevations and install some roof lights to the east and west roof slopes.

Relevant Policies of any Plan, Subject Plan or Local Planning Brief:

GP8: Design

GP9: Sustainable Development

GP13: Householder Development

Representations:

There has been one letter of representation and the issues are:

- There are concerns regarding the size and location of the proposed skylights in the east elevation roof, which were not shown on the original plans for the dwelling, and may have direct line of sight into our property thus impacting on our privacy.

Consultations:

None

Summary of Issues:

- Design of the development.
- Impact of the development on the character and appearance of the area.
- Impact of the development on neighbouring properties.

Assessment against:

1 - Purposes of the law.

The objectives of the Law, as set out in Section 1(2), have been considered and this forms part of the assessment of policy issues as set out in 2 below.

2 - Relevant policies of any Plan, Subject Plan or Local Planning Brief.

The initial plans showed a small window at first floor level on the north elevation, the proposals expand this window, which overlooks an open field and adds two more first floor windows on the south elevation, overlooking their own garden.

The eastern roof lights are 10m from the property boundary and between 18m – 20m from the nearest neighbour, which is considered an appropriate distance not to warrant raised cill levels.

The proposals achieve a good standard of design, will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The new rooflights and windows at first floor are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

3 - General material considerations set out in the General Provisions Ordinance.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application. Where relevant the issues are considered in section 2 above.

4 - Additional considerations (for protected trees, monuments, buildings and/or SSS's).

The proposal would have no impact on Protected Buildings, Trees or Monuments or on SSS's.
