Conclusion/Brief comment:

This application is to partially demolish the rear extension and extend across the whole of the property, to reconfigure the kitchen and create a dining room, as well as retaining a small utility room and shower room. The application also proposes to insert a first floor window into the south facing gable to service a new bathroom.

The run of properties to the south are at a slightly higher level and the proposed new window would overlook the porch and front door of the neighbouring property. It has been agreed that the glazing in this window is obscured to prevent any overlooking in each direction, this will be conditioned.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunlight and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
