Conclusion/Brief comment:

This application is to raise, extend and alter the roof ridge height at second floor level, extend and alter at ground and first floor level to the east side elevation and some alterations to the fenestration.

This is the third iteration of the scheme to raise the ridge and extend the property to the east elevation (the rear of the property which faces towards the open fields) and includes a 1.4m extension at ground, first and second floor levels on the east elevation.

The roof has been simplified and the balconies on the south elevation remain as per the second scheme which was approved in May this year.

These additional changes are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation. The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
