OFFICER'S REPORT

Brief Description of the site:

The property known as 'Les Marchez' is a two storey granite property with a one and a half storey extension to the west and a single storey connected outbuilding also to the west, there is an old vinehouse attached to these two buildings on the front facade. A large parking area and modern garage are to the east. The property is set back from and faces south onto Rue des Reines. There is an open agricultural field to the west, other detached properties to the north, a field to the east and one detached property and two agricultural fields to the south across the road. The property is located Outside of the Centres, within a Conservation Area and the Agriculture Priority Area as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to remove the existing vinehouse and erect a smaller single storey flat roof extension in its place with a pergola to the south front elevation.

Although the original vinehouse is architecturally and visually appealing, it is now in poor shape and is not considered to contribute to the character and appearance of the surrounding conservation area. Therefore its removal is not considered to be a concern.

Despite the proposed extension being located at the front of the property, it is to replace the vinehouse to one side of the front elevation, which is partially hidden by a high (painted white) granite front boundary wall, which lowers in front of the main dwelling.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area as it will be partially screened by the front boundary wall, giving the occupants some degree of privacy, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
