Conclusion/Brief comment:

This application is to install dormer windows to the front and rear roof slopes and rooflights to the north and south side roof slopes to provide first floor accommodation.

The application was deferred as there were concerns about the detailing of the rear dormer. The amended drawings now show a dormer with a lower ceiling height, which now will not hang over the side of the hipped roof.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The loft conversion will provide adequate

levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormers are not considered to have a detrimental effects on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
