Conclusion/Brief comment:

This is a retrospective variation application to extend the property at first floor level, alter some of the first floor fenestration and move a rooflight.

The first floor accommodation is now a full rectangle, adding a dressing room to the third bedroom and enlarging the family bathroom. A small obscure window is being added to the southeast elevation serving the bathroom and an additional window on the northeast elevation. A window on the northwest elevation has been omitted.

All other aspects are as per the initial design, the changes are fairly minimal and do not greatly alter the design, character and appearance of the dwelling or impact on the surrounding area. The changes are not considered to impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
