Conclusion/Brief comment:

The proposed change of use of part of the ground floor does not need permission as it is considered to be ancillary to the main use of the units. The erection of the canopy with external steps and balustrade to the side (west) elevation is acceptable in design terms and would not compromise a significant area of parking. The

alterations proposed to fenestration are acceptable and result in minor, small scale changes.

The proposed signage has been revised to remove all illumination and one of the high level large signs at the request of the planning officer, and the design has been revised at the request of the applicant. The unit is located within an existing industrial area which is urban in character and adjacent units have similar levels of signage. On this basis, the proposed signage is considered visually acceptable in this location and accords with Policy GP8.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
