Conclusion/Brief comment:

This application is to remove a section of earthbank and replace with a low wall and planting, plus erect two sets of pillars either side of the existing vehicular entrances and add gates.

The replacement low wall and planting are considered exempt and so will not be further assessed as part of this report.

The section of earthbank to be removed is approx. 11m, which is just over a quarter of the length of the eastern boundary, 16m of which will remain as earthbank with hedging above. Given the amount of existing earthbank to remain and that there will be low planting replacing the earthbank and hedge, the proposals seem to be a reasonable aspiration of the homeowners.

The pillar and gates will only be 1.2m in height which prevents the feeling of barricading and are considered to be acceptable and appropriate for the rural location.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
