Consultations:

The Office of Environmental Health and Pollution Regulation (OEHPR)

By letter dated 18th October 2024 stated the following:

"I have reviewed the proposed plans for the Iconic Air 16/23kW ASHP model which were received by email on 14th October 2024 and there is an issue of concern that I must raise. The applicant has sought advice from The Office of Environmental Health and Pollution Regulation prior to submitting the application FULL/2024/1638 to the Planning Authority. As such, I can confirm I have carried out calculations and it is estimated that at the nearest receptor the noise from the ASHP could be 17 dB. As such, I would recommend the below condition is applied to this application.

- Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing background noise levels shall be determined as per the guidance provided in BS 4142:2014.*

I would be grateful if these issues are considered during the determination of this application."

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
