Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the rear southeast elevation and demolish a section of the existing single storey side southwest extension. Install a window (instead of a door) where the extension has been removed and add a fence along the southwest boundary.

The northwest elevation shows a slight difference in ground levels and so in areas the front 0.9m high fence will appear higher, requiring planning approval. However, the change in height is minimal and the fence forward of the building line is considered acceptable and complies with policy. The revised plans show the retention of the hedging along the rear part of the south-west boundary, and the erection of new rear fence at 1.8m high would otherwise comprise exempt development.

The rest of the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
