Consultations:

The Office for Environmental Health & Pollution Regulation by letter dated 30th October 2024 stated the following:

I have reviewed the proposed plans for a larger kiosk to replace an existing water pumping kiosk at the above mentioned location which were received by email on 15th October 2024 and I recommend the following condition.

- Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing background noise levels shall be determined as per the guidance provided in BS 4142:2014.

Conclusion/Brief comment:

Planning permission is sought to install a replacement enlarged pumping station kiosk to the south boundary of the site.

The proposal would contribute to the maintenance and support of existing small-scale infrastructure. The proposed works, by virtue of the limited nature, design, and positioning, would not have a significant impact on the visual amenity or character of the area and would not raise any amenity or road safety concerns.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
