OFFICER'S REPORT

Brief Description:

The application relates to the erection of a utility extension to the east of the dwelling (permission required due to window being within 3m of the boundary) and the installation of rooflights.

The plans also show the following works, which would not require planning permission:

- Erect boot room extension to south elevation;
- Alteration to existing fenestration (north and east elevation);
- Replacement of existing fenestration;
- Installation of a rooflight to the west roofslope;
- Replacement ridge tiles;
- Installation of flue;
- Installation of replacement oil tank and associated blast wall.

The site is located Outside of the Centres as designated in the Island Development Plan.

Conclusion/Brief comment:

The rooflights indicated to the east and south roofslopes are within 10m of the boundary with adjacent residential properties. To comprise exempt development the cill height of the rooflights must be more than 1.7m above finished internal floor level. The east facing rooflight would be located within a vaulted roof space and would therefore meet this requirement. This is less clear in respect of the south facing rooflight however, taking into account the position of a stairwell, it is considered unlikely that this rooflight would give rise to any overlooking issues.

The proposed bootroom extension would not give rise to any adverse impacts.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
