Conclusion/Brief comment:

This application is to erect a first floor extension over the existing single storey utility room on the west side elevation of the dwelling, it will extend the front bedroom and provide an ensuite for the master bedroom.

The window to the rear (south facing) elevation at first floor level has the potential to overlook private space belonging to the property to the west (La Dola). However, given the separation distances involved (circa 20m from the private patio area) and that any views would be at an oblique angle and mainly over the driveway of the property the proposal would not cause undue harm to privacy. Furthermore, the window is serving an ensuite and is therefore likely to be obscure glazed however given the above it would be unreasonable to ensure this and to control its installation by condition.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
