Conclusion/Brief comment:

This application is to erect a small ground floor extension to the rear of the existing garage and erect a first floor extension over the garage and rear extension. The ground floor will house a utility room and the first floor will house a master bedroom/dressing room/study.

Although this would be the first property to extend over the garage, the Island Development Plan does support multi-level building and so the proposals are considered to be acceptable and appropriate.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours because the new rear first floor window will have obscure glazing and the bottom pane fixed shut, to prevent overlooking. This can be conditioned.

The front first floor inward opening doors with small balcony are not considered to have any impacts as the views are over the public front driveways and gardens rather than overlooking private amenity space. They are therefore considered to comply with policy.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
