Conclusion/Brief comment:

This application is for remedial repair and maintenance works to the arches, which consists of removing the greenery (mostly ivy) from the structure, repairing loose stonework and repointing with lime mortar the areas specified in the accompanying photos.

Initially the application was deferred to request the photos which outline the exact areas which need attention, to ensure the extent of works is clearly understood.

It is apparent that these repairs are required in order to protect and preserve the structure, and the proposals are considered to comply with the relevant policies, without impacting the character and appearance of the surrounding conservation area, or affecting neighbour amenity.

Should the scope of works expand then the Authority must be contacted for further discussion and agreement before any work is carried out outside of the agreed areas.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
