Conclusion/Brief comment:

This application is to remove the two first floor west gable glazing and build up the wall and add a single window in each gable. The windows serve the master bedroom (main gable) and bedroom 4 (rear gable).

Part of the reasoning to remove the glazed gable wall is to increase the thermal insulation by having more insulated wall and less thermally inefficient glazing, and to install smaller thermally efficient windows instead. This would also reduce passive solar gain and moderate the internal temperatures.

Removing the large expanse of glazing would also prevent any overlooking from, or looking into the dwelling from public viewing points. The proposals are considered to achieve a good standard of design, and are not considered to have a detrimental

effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Reducing passive solar gain by reducing the expanse of glazing is considered to be appropriate and is supported by policy GP9, as is increasing the thermal efficiency of the building.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
