Conclusion/Brief comment:

This application is part retrospective, to demolish a 6m section of rear boundary wall which delineates the domestic curtilage from the agricultural land in the same ownership. The second part of the application is to install 1.2m high galvanised estate fencing and matching gate.

The 7.2m gap in the southwest domestic boundary does allow for more open views from the property and so it is understood that rebuilding the wall would block the newly opened landscape. However, on opening up the boundary several domestic items have been spilling onto the agricultural land for which no approvals have been sought. To prevent this from continually happening the applicants are reintroducing a physical boundary by way of the estate fencing, which will retain the open landscape better than replacing the wall, whilst retaining demarcation to the domestic land.

The proposed painted black galvanised estate fencing and gate (from Jackson fencing) are considered to be appropriate and acceptable for the location. They will not have any detrimental impacts on the character and appearance of the surrounding landscape, nor will they have any adverse effects on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
