Conclusion/Brief comment:

This is a retrospective application to erect a fence and gate around the existing GRP Housing base.

The substation has been in the current location for over 20 years and for several years it has been surrounded by a metal chain link fence and metal gate, both of which were see through and you could view the machinery from the road.

The new timber gate and fence are less transparent, which helps to block the view of the machinery from the public.

The new housing is considered to improve the visual amenity of the substation in the area, therefore it is considered not to have any impacts on the character and appearance of the surrounding area, nor will it have any adverse effects on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

Recommendation:

Grant with Conditions
