Conclusion/Brief comment:

This application is to demolish the existing rear kitchen/conservatory extension and replace it with a larger single-storey flat roof extension to house a lounge/dining/kitchen area, guest bedroom/bathroom and utility across the rear east elevation; with a smaller first floor extension to house two new bedrooms above, also to the rear/east elevation.

This mid-20th century dwelling has been remodelled in the past and so the proposed modifications are considered to enhance the changes. The front façade is to remain unchanged with the new rooflight and garage door representing exempt development. Other alterations to fenestration, such as to the gable ends, are associated with the proposed rear extension.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
