- IP9: Highway Safety, Accessibility and Capacity

Conclusion/Brief comment:

This application is to infill the existing vehicular access (at the southern end of the west boundary) and to create a new, more central vehicular access, c. 4m wide, in the middle of the western boundary including a small bellmouth to each side.

Rue Colin is a neighbourhood road, which is lightly trafficked, so moving the vehicular entrance 5m north of the existing entrance is not considered to have any impacts on highway safety. The low boundary wall will not impact sightlines and the new access will not increase the volume of vehicles accessing the site.

The proposals are considered to achieve a good standard of design, and are not considered to have any detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
