Conclusion/Brief comment:

This application is to replace the two north facing small, pitched roof dormers with larger catslide dormers.

In the area there are a number of different styles of dwelling with both pitched roof dormers and catslide dormers, so the change is not considered to have any detrimental impacts on the character and appearance of the surrounding area.

As the building appears to be of a more modern design, larger catslide dormers are considered to be acceptable.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The new dormers will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormers are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
